

# The telehandler for industry. With SML power.

The intelligent, robust combination of telehandler and wheel loader, specially designed for demanding applications in the recycling industry. Developed by specialists, this machine combines the product advantages of both concepts and also offers the plus of safety through the unique, elevating cab.

The SML power of our Multi Line telehandlers. Engineered and built

in Germany.

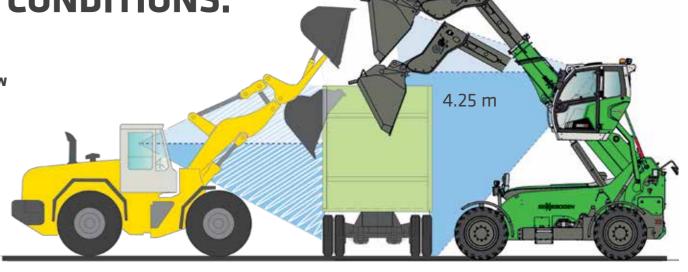

- Optimal loading process thanks to an ideal view into the truck or container provided by the elevating cab's 4.25 m viewing height
- Safety even when maneuvering Good view of all four of the machine's tires
- Greater overview

360° panoramic view through large windows and an elevated seat position in the cabin through enlarged glass surfaces

Subject to technical changes. Additional options available upon request.

ROBUST. **DOWN TO THE LAST DETAIL.** 

#### STEEL FRAME

The machine's high-strength solid steel frame meets the most demanding service life requirements and has been optimized using the FEM (finite element method). It relishes demanding and dynamic applications. SENNEBOGEN's own steel construction experience ensures the best possible quality.

#### STEEL TELESCOPIC BOOM

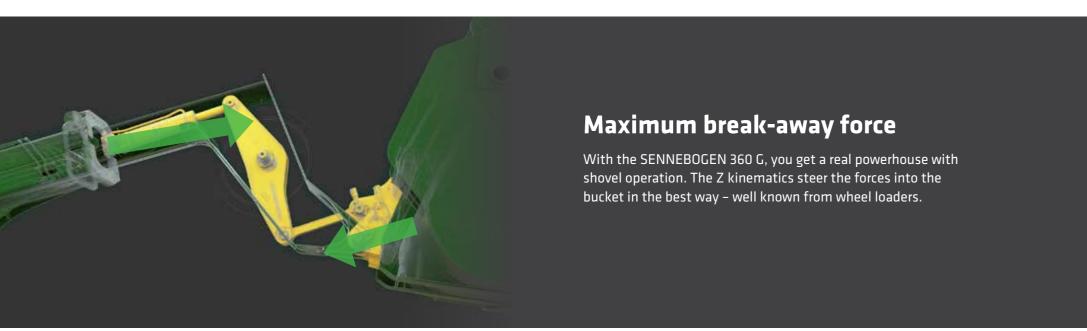

The robust telescopic boom has been designed with state-of-the-art tools and optimized for heavy-duty applications. The central positioning and sophisticated shape of the boom optimally transfer the forces into the frame. Stress-free operation enables end position damping on both sides in the telescopic cylinder.

The central and side-guided design optimally absorbs all thrust forces and the robust frame remains dimensionally stable. The telescopic boom is located in the best possible position – with the elevating cab, the operator can always see along the boom.

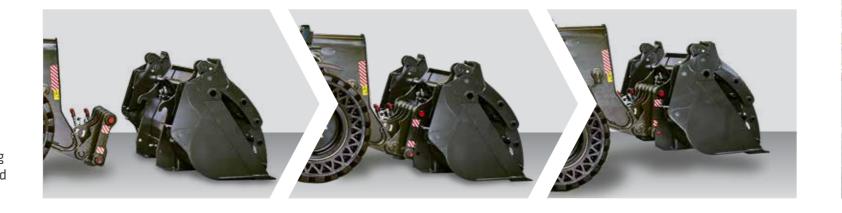

# THE TELEHANDLER WITH WHEEL LOADER TECHNOLOGY.

# Tool change at the push of a button

The robust SENNEBOGEN hydraulic quick-change system perfectly complements the telehandler's Z kinematics: reinforced frame, large-scale bolts, dual-action locking cylinder – everything can be operated at the push of a button.

# ALWAYS FULL POWER.

#### THE POWERFUL AND CLEVER DRIVE TRAIN

The 360 G's variable travel drive always supplies generous amounts of power thanks to the combined efforts of the diesel engine and the hydraulic numns.

The innovative control of the drive unit ensures that the drive engine provides rapid travel or high torque as required.

The system will automatically guarantee the optimal setting for fast travel, handling an uphill gradient, or picking up heavy materials.

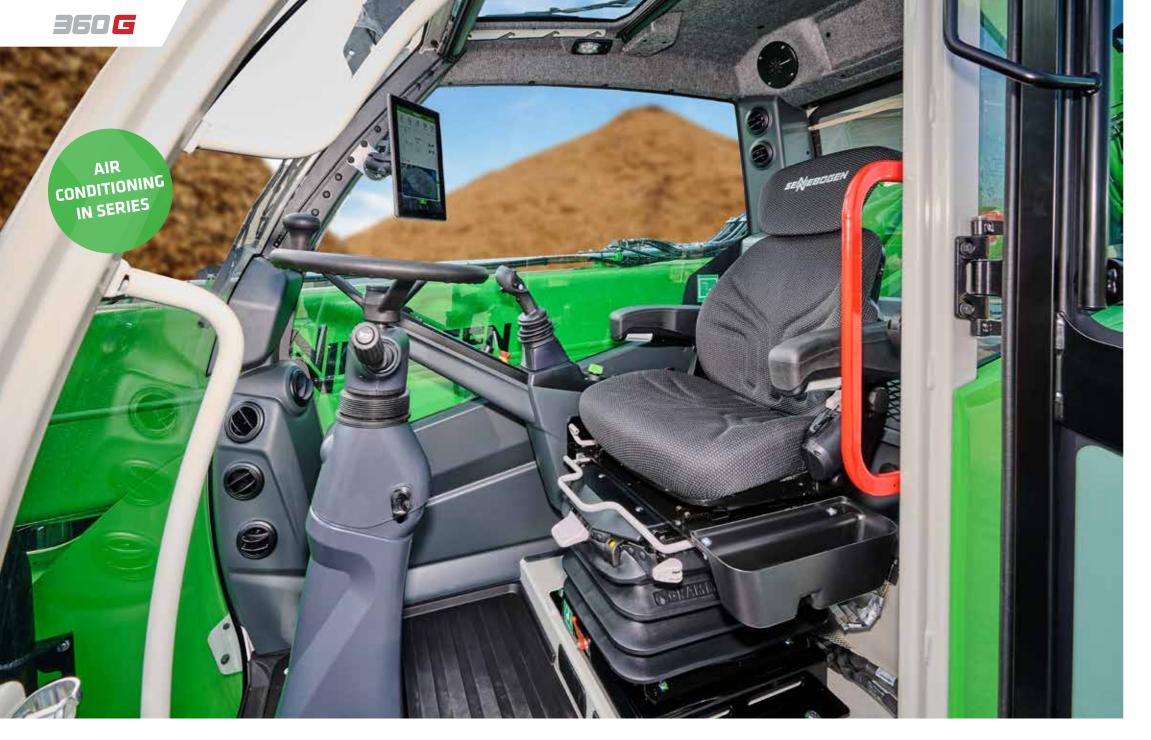

By default, the machine travels at a maximum speed of 20 km/h. But speeds of 40 km/h are no problem for the powerful unit.

#### **MAXIMUM DRIVING DYNAMICS AND LOW CONSUMPTION**

- Robust and durable with reinforced HD axles for industrial use
- High speed as well as tensile and pushing force for fast work cycles
- Low operating costs thanks to engine speed reduction at maximum driving speed

# **NEW OPERATING CONCEPT.**

Our comfortable driver's cab allows for concentrated and relaxed work through an operating concept that adapts individually to the driver. A central touch display replaces conventional toggle switches and allows intuitive settings according to personal preferences. Protected from noise and vibrations, the driver can fully concentrate on his work. The excellent view and ergonomically arranged, co-swinging controls ensure an optimal working environment. Numerous storage options, modern connections (USB, 12 V, 24 V) and the standard air conditioning system make working a personal comfort experience.

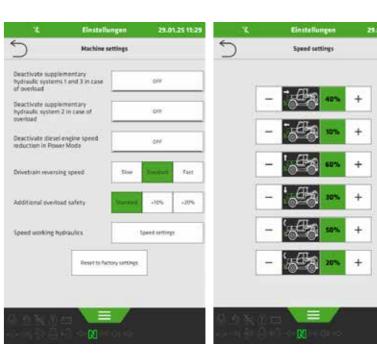

# 10-INCH TOUCH DISPLAY.

#### **QUICKEST ACCESS TO ALL IMPORTANT FEATURES**

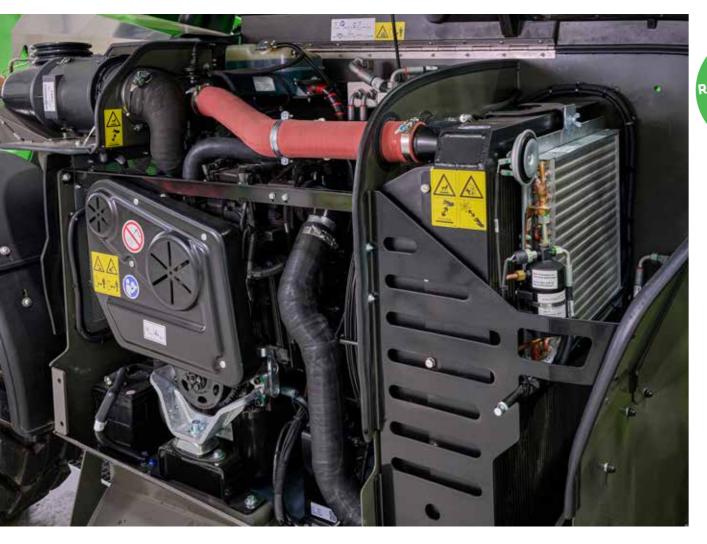

Adjust machine settings quickly and easily

Speed settings for the most important work functions

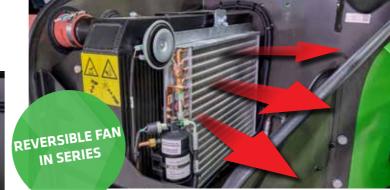

# SOPHISTICATED TECHNOLOGY.

ALWAYS RELIABLE.

#### SOPHISTICATED DOWN TO THE LAST DETAIL

The SENNEBOGEN 360 G always works productively. The powerful reversible fan comes as standard and reliably ensures free air intake and thus optimal cooling performance, even in the most adverse conditions.

Working with fewer refueling stops: Thanks to the economical consumption and the large diesel tank, the 360 G keeps you moving for longer, even in multi-shift operations.

Subject to technical changes. Additional options available upon request.

# TECHNICAL DATA, EQUIPMENT

OPERATING DATA	
OPERATING WEIGHT <sup>1</sup>	12.500 kg
STACKING HEIGHT	8.500 mm
MAX. LOAD CAPACITY (LSP 600 MM)	6.000 kg
MAX. LOAD CAPACITY AT MAX. HEIGHT	6.000 kg
MAX. LOAD CAPACITY AT MAX. REACH	2.200 kg
MAX. TRAVEL SPEED	20/30/40 km/h
TENSILE FORCE <sup>2</sup>	91 kN
BREAK-AWAY FORCE ON THE SHOVEL <sup>3</sup>	85 kN

DIESEL ENGINE	•
TYPE	Stage V Cummins B4.5-C165 FR95723 Nominal engine power: 123 kW / 2.200 rpm Standard operating point: 123 kW / 2.200 rpm ECO operating point: 111 kW / 1.500 rpm
EXHAUST AFTERTREATMENT	DOC + SCR + DPF
DISPLACEMENT	4.5
MAX. TORQUE	763 Nm
ENGINE OIL	SENIube ENGINE LONGLIFE 5W-30-LA

TANK CAPACITIES	
DIESEL TANK	160 I
HYDRAULIC OIL TANK	140
SCR TANK	16 l

HYDRAULIC SYSTEM	
OPERATING PUMP	Load sensing axial piston variable displacement pump
OUTPUT	200 I/min
WORKING PRESSURE	310 bar
OUTPUT ZH1 <sup>4</sup>	up to 180 I/min

# LOAD RATINGS AND OPERATIONAL RANGE

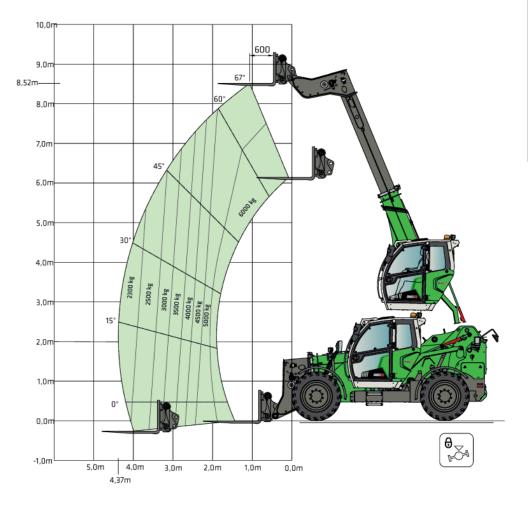

Operation with lifting fork / with oscillating axle interlock / with level compensation

All values according to the safety standard DIN EN 1459 / DIN ISO 22915-14.

They apply to the SENNEBOGEN standard lifting fork with a deviation of max. +/- 5° to horizontal.

Operation with lifting fork / with oscillating axle interlock

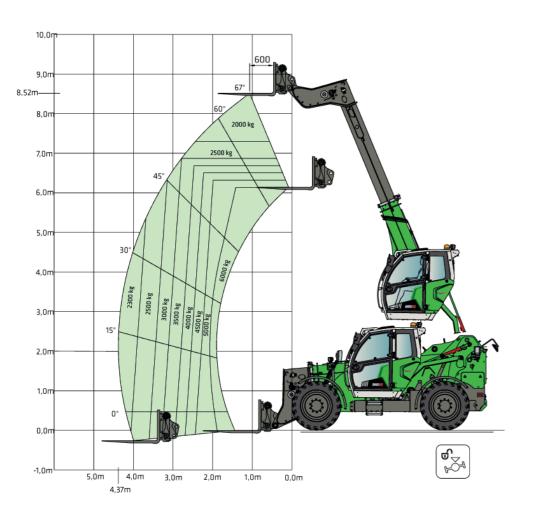

All values according to the safety standard DIN EN 1459 / DIN ISO 22915-14.

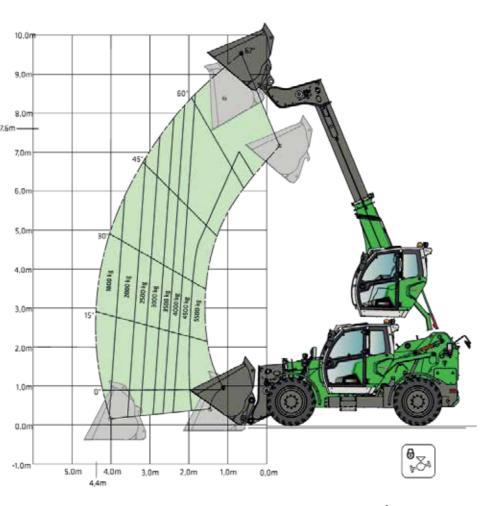

They apply to the SENNEBOGEN standard lifting fork with a deviation of max. +/- 5° to horizontal.

### LOAD RATINGS AND OPERATIONAL RANGE

Operation with lifting fork / without oscillating axle interlock

Operation with shovel / with oscillating axle interlock

The permissible bulk material densities must be taken into account. The dead weight of the shovel is included in the payload.

The specified load capacities only apply to the use of the SENNEBOGEN loading shovel with 2 m3 loading volume. Payloads should be moved in the transport position with the boom retracted and lowered.

# STANDARD EQUIPMENT AND OPTIONAL EXTRAS

BASIC MODEL	
360 G - SENNEBOGEN G-series telehandler (Stage V) 123 kW	•

# POWERFUL WORK HYDRAULICS.

#### POWERFUL DRIVE, ECONOMICAL CONSUMPTION

Each work function always receives the hydraulic power it requires to operate optimally. Instantaneous signal processing between joystick and main control block ensures sensitive and responsive operation for all the machine's hydraulic functions.

In addition to the main functions – the lift cylinder, tilt cylinder, telescopic cylinder and the elevating cab – the work hydraulics also control the additional hydraulic connections just as effectively.

#### **EQUIPPED FOR MANY USES**

Auxiliary hydraulics 1 (ZH1)
For quick and easy
connection of
attachments
(standard)

- Maximum hydraulic power for required work functions
- Optimized speed for telescoping the boom, lifting the telescopic arm and driving dynamics

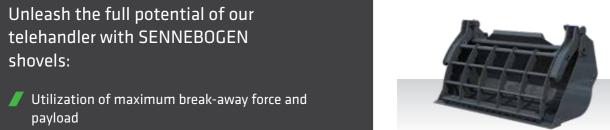

360 **G** 

# 360 **G**

# **SHOVELS**

With SENNEBOGEN shovels, you get attachments specially optimized for our telehandler, which match the machine's high quality standards.

Our shovels are designed for the tough working conditions of the recycling industry. The robust design with highly wear-resistant materials and hardened components, and the shape and center of gravity optimization, offer ideal conditions for long-term continuous loads.

- Lower fuel consumption
- Reduced drive train load
- Shorter loading cycles
- Greater working comfort and safety with the hold-down shovel

#### **SOIL SHOVEL**

1.6 m<sup>3</sup> with and without teeth

Bulk material density: up to 1.8 t/m<sup>3</sup>

Shovel weight: approx. 610 kg

#### LOADING SHOVEL

2.5 m<sup>3</sup> for bulk material density up to 1.2 t/m<sup>3</sup> (shovel weight: approx. 870 kg)

3.0 m<sup>3</sup> for bulk material density up to 1.1 t/m<sup>3</sup> (shovel weight: approx. 960 kg)

#### **HOLD-DOWN SHOVEL**

2.5 m<sup>3</sup> incl. reversible blade bolted to underside for bulk materialdensity up to 1.4 t/m<sup>3</sup> (shovel weight: approx. 1.480 kg)

Subject to technical changes. Additional options available upon request.

3.0 m<sup>3</sup> incl. reversible blade bolted to underside for bulk materialdensity up to 1.0 t/m<sup>3</sup> (shovel weight: approx. 1.560 kg)

#### LIGHT-GOODS SHOVEL

3.5 m<sup>3</sup> for bulk material density up to 1.0 t/m³ (shovel weight: approx. 840 kg)

4.0 m<sup>3</sup> for bulk material density up to 0.9 t/m³ (shovel weight: approx. 920 kg)

5.0 m<sup>3</sup> for bulk material density up to 0.7 t/m<sup>3</sup> (shovel width: approx. 3000 mm)

# **TIRES**

No matter what application, it's the ground that forms the contact surface with the machine. Therefore, only the right tires can provide optimum safety.

We will provide you with the best tires for your application. Rely on our experience and get advice on achieving the best performance, safety and service life.

Subject to technical changes. Additional options available upon request.
